

You Ought To Be In Pictures provides both **image** and **video** coverage for the price most companies charge for these services separately!

By using digital proofs, we **eliminate** the cost of printing proofs. During the **editing process**, we incorporate the best **still images** with the **video** taken, eliminating the need for more than one videographer, **saving you money**, while at the same time creating DVD's that most couples find **superior to video alone!**

Experience the difference in customer service, when you work with the owner of the company every step of the way!
